2016 - 2020

B.E Mechanical Engineering

Govt. engineering college, Salem

Expertise

- Strong Knowledge of HTML5, CSS3 and JavaScript, Jira Tool
- Frontend : React.js, Angular.js, Next.js, Redux
- Backend : Node.js, Express.js
- Database : MySQL, MongoDB
- Version Control : Git
- Testing : Jest
- UI Framework : MUI, Style Component, Bootstrap 5

Language

English

Tamil

Projects Handled

- e-Learning Platform
- IHAF Political Website
- NFT Dashboard
- AI Chatbot
- Chatbot
- Token Bridge

METAWEBIX

2.3 years Experience

e-Learning Platform

Duration : 6 Months

- Spearheaded the development of a React.js-based learning platform, managing a myriad of complex components and interactive features.
- Collaborated with UX/UI designers to implement responsive and intuitive interfaces, resulting in a 20% increase in user engagement.
- Resolved performance bottlenecks through optimized React components, leading to a 15% improvement in website load times.
- **Video Purchase and Security Integration** Successfully integrated Razorpay payment gateway for seamless and secure video purchases, enhancing the ecommerce capabilities of the learning platform. Implemented robust security measures to restrict unauthorized video recording, safeguarding proprietary content. Devised and integrated anti-scam mechanisms, preventing fraudulent activities and ensuring a trustworthy user environment.

IHAF Political Website :

Duration : 4 Months

- Creating an introductory section for a political website is crucial for engaging visitors and conveying the purpose, mission, and key features of the website.
- Implement a user registration and login system using react authentication mechanisms or third-party libraries like Firebase Authentication. Allow users to sign up, log in, and manage their profiles.
- Key Achievements :
 1. Integrating YouTube, Instagram, and Twitter feeds directly into our political website can enhance engagement, provide dynamic content, and allow visitors to interact with our social media channels without leaving our site.
 2. Adding animations to the slider on the landing/main page of our political website can enhance the visual appeal, engage visitors, and create a dynamic user experience. Implementing fade-in and fade-out animations for components as they become visible during scrolling is a popular technique to enhance the user experience and add a touch of interactivity to web pages
 3. Adding phone number verification to your political website can enhance security, prevent spam registrations, and ensure that users provide valid contact information.
 4. Implementing an admin dashboard to manage user data, including phone number verification, is essential for maintaining control, ensuring security, and handling administrative tasks efficiently

AI Chatbot

Duration : 3 Months

- Created user friendly Chatbot for a Learning Website with the inspiration of latest AI Technology which is used in ChatGPT developing
- The chatbot to work seamlessly across multiple platforms such as websites, mobile apps, and messaging platforms.

Token Bridge

Duration : 4 Months

- Spearheaded the integration of Metamask wallet connectivity to our web platform, enabling seamless interaction with the Wagmi protocol.
- Collaborated with blockchain developers to ensure secure and reliable transaction processing. Implemented secure transaction processing through the integration of Wagmi, ensuring a reliable and decentralized experience for users. Video Purchase and Security Integration Successfully integrated Razorpay payment gateway for seamless and secure video purchases, enhancing the ecommerce capabilities of the learning platform. Implemented robust security measures to restrict unauthorized video recording, safeguarding proprietary content. Devised and integrated anti-scam mechanisms, preventing fraudulent activities and ensuring a trustworthy user environment.
- **Technical Tools Used**
- **Languages:** JavaScript (ES6), HTML5, CSS3,TailwindCSS,
 - 1.**Frameworks:** React.js, Node js
 - 2.**ReduxTools:** Webpack,Redux,
 - 3.**Testing:** Jest,
 - 4.API's:REST and GRAPHQL,
 5. **Blockchain Integration:** Metamask, Wagmi Protocol,
 - 6.**Animation Libraray:**React Framer Motion

Key Achievements:

- 1.Introduced an eye-catching wave animation using React Framer Motion, contributing to a 15% increase in user engagement and platform aesthetics.
- 2.Empowered users with the flexibility to convert their cryptocurrency holdings to their preferred fiat currencies, fostering a seamless and user-friendly experience.
- 3.Established real-time monitoring of Metamask connections, allowing immediate response to security events and ensuring a secure user environment.

NFT Dashboard

- **User-Friendly Interface:** Creating an intuitive and visually appealing user interface that allows users to easily navigate and understand the dashboard.
- **Comprehensive Monitoring:** Providing detailed insights and analytics on NFT performance, maintenance history, and other relevant metrics.
- **Alerts and Notifications:** Implementing automated alerts and notifications for critical events, such as maintenance updates, issues, or anomalies.
- **Customization:** Allowing users to customize the dashboard layout, display preferences, and set personalized alerts or filters.
- **Integration with External Services:** Seamless integration with blockchain platforms, smart contracts, or other external services to fetch and update NFT data.
